Description	Tourism development projects in Western Australia - number and value of lettable units completed and under construction.
Coverage	A comprehensive accommodation development database tracks new accommodation projects that directly relate to or impact on the growth and development of the tourism industry in Western Australia. The database is updated with the assistance and cooperation of local government, developers, consultants and other sources. Whilst every attempt is made to identify and include all new developments occurring in WA, this is not always possible due to reasons of confidentiality and/or lack of information some omissions may occur from time to time.
